

Sonoma Skypark Newsletter

May 2020

Airport happenings “April showers, bring May Flowers.” Mother nature is reminding us of the beauty in this world, California poppies are appearing all over the airport in a stunning fashion. There is not much happening at Skypark these days, locals continue to fly around the valley and area pilots pop in once in a while to practice landings. Av-gas is at an all-time low, one gallon of 100LL will set you back \$3.75. It is a good deal considering Pre- Pandemic Av-gas was selling for nearly \$5.00 per gallon. Airport manager **Ron Price** has been social distancing by flying his Vagabond and Luscombe Model 4.

There is a new weather camera installed at the airport curtesy of **Jeff Spears**. The weather camera also has a wind meter associated with it. To see the weather at Skypark, download the **Bloomsy** app on your Android or IOS device. Once downloaded just search for Sonoma.

Burger Day, Vintage Movie Night & Young Eagles will remain postponed until the county lifts “shelter in place” orders. When restrictions are lifted, we will adhere to any social distancing requirements/Guidelines.

We hope everyone is staying healthy during these times. Come by the airport and exercise your airplanes! Spring is a lovely time to fly around the valley.

Blue Skies,

Colin Traynor
